

## Birds are great!

From the nine-foot-tall ostriches of the savanna to the tiny Bee Hummingbird of Cuba, birds are wonderfully diverse.

They can be bright blue, emerald green, and stunning yellow. Albatrosses have enormous wings for gliding over remote oceans. Quail have tufts of feathers on their heads that bob when they run. Owls have precise hearing for hunting rodents at night.

Some birds swim through icy Antarctic waters. Others fly through dense tropical rainforests. A few can soar over the Himalayan peaks.

From one end of the world to the other, birds thrive in the heat and cold. They live in jungles,

deserts, and craggy coasts. These tiny modern dinosaurs are full of activity, finding food, building nests, and raising young.

The world of birds is vast and wonderful. Birds are fun and familiar, but also full of surprises. No matter if you're a beginner or experienced birder, there's always something new to learn. Ready to dive in?

This book is your introduction to the world of birds. Think of it as a little interactive museum. Explore its hallways in whatever order you like. Read about fun and fantastic birds. Try out some activities. Give birds realistic colors or grab your favorites and let your imagination run wild.

Now, put on your thinking caps, grab some art supplies, and fly to whatever page you like.
